The Future of Injectable Collagen.
Bio Restorative Softfiller.

SYNERGY OF FORMULA

- Increases the production of type I procollagen C-Peptide in Fibroblasts which facilitates the wrapping of pro-collagen molecules in a triple helix conformation within the endoplasmic reticulum.
- An anti-aging effect in the dermis: it inhibits the action of the hyaluronidase enzyme and preserves endogenous hyaluronic acid, and while remaining in the tissues, continues to perform its hydration and tissue repair activity in depth.
- It participates in the creation of a favorable environment for the proliferation and metabolism of fibroblasts.

RESULTS

- Remodeling and restoration of volumes;
- Deliver an enhanced lifting effect;
- Enhancing tissue tonicity and firmness.

INDICATIONS

- Combats skin aging and volume loss;
- Reduces fine lines
- Improves on sagging skin
- Improves the appearance of scars

PROTOCOL

Only 2 applications are required at monthly interval.

Call back after 6 months
